Benyo, Imre: Cascade generalized predictive control – applications in power plant control. 2006

Hätönen, Jari: Issues of Algebra and Optimality in Iterative Learning Control. 2005

Ikonen, Enso: Algorithms for process modelling using fuzzy neural networks: A distributed logic processor approach. 1997

Ketonen, Matti: Benefit assessment of automation investments in chemical process industries. 1998

Kiukaanniemi, Eino: A systematic approach to the development task of peat fuelled heating plants. 1978

Kovacs, Jenő: Model reference adaptive PIP control algorithms: Application to boiler drum control. 1998

Kärkkäinen, Paavo: On the Control of Manipulator Flexible Motion by Modal-Space Techniques. 1985

Leppäkoski, Kimmo, Utilisation of non-linear modelling methods in flue-gas oxygen-content control. 2006

Manninen, Markku: Task-Oriented Approach to Interactive Control of Heavy-Duty Manipulators Based on Coarse Scene Description. 1984

Nyberg, Jens: Characterisation and Control of the Zinc Roasting Process. 2004

Penttinen, Riitta: A decision support system for water protection in agriculture. 1998

Rantanen, Rami: Modelling and control of cooking degree in conventional and modified continuous pulping processes. 2006

Saukkonen, Samuli: A constructive method for the architectural design and correctness verification of real-time programs. 1983

Sallinen, Mikko: Modelling and Estimation of Spatial Relationships in Sensor-based Robot Workcells. 2003

OY säätötekniikka

Ahola, Timo: Intelligent Estimation of Web Break Sensitivity in Paper Machines. 2006

Frantti, Tapio: Timing of Fuzzy Membership Functions from Data. 2001

Gebus, Sébastien: Knowledge-Based Decision Support Systems for Production Optimization and Quality Improvement in the Electronics Industry. 2006

Huusko, Antti: Milled Peat Production Optimisation, a Study of the Development of the Planning system. 1997

Jaako, Juha: The Extension of Multilevel Flow Modelling. 1996

Junno, Seija: Optimization of Steel Mill Production. 1989

Jutila, Esa: Applicability of kraft cooking control models. 1979

Kaarela, Kari: Enhancing Communication of Plant Design Knowledge. 1996

Karppanen, Erkki: Advanced Control of an Industrial Circulating Fluidized Bed Boiler Using Fuzzy Logic. 2000

Keski-Säntti, Jarmo: Neural networks in the production optimization of a kraft pulp bleach plant. 2007

Kess, Pekka: A Systematic Approach to the Development of a Control Philosophy for the Process Industries. 1992

Leiviskä, Kauko: Short Term Production Scheduling of the Pulp Mill. 1982

Lindfors, Juha: A Modern Learning Environment for Control Engineering. 2002

Niemi, Antti: A Study of Dynamic and Control Properties of Industrial Flotation Processes, 1966

Näsi, Jari: Intensified use of process measurements in hydrometallurgical zinc production processes. 2007

Pesonen, Lasse T. T.: Implementation of Design to Profit in a Complex and Dynamic Business Context. 2001

Sopenlehto-Pelkonen, Taina: Customer Focused Process Applications and Utilization Studies of Special Instruments in Pulp and Paper Industry. 1996

Uronen, Paavo :Modelling and simulation of catalytic autothermic gas reactors, 1971

Yliniemi, Leena: Advanced Control of a Rotary Dryer. 1999
