

TKK systeemiteoria (-1985, säätötekniikka -1968)

Blomberg, Hans: A sensitive mirror instrument for integration of small electric voltage impulses respect to time. 1953

Eirola, Timo: A study of the back- and forth shooting method. 1985

Golemanov, Ljudmil A.: Systems theoretical approach in the projecting and control of industrial production systems. 1972

Hakkala, Lauri: On two-level methods for online coordination of dynamical systems. 1978

Halme, Aarne: Polynomial operators for nonlinear systems analysis. 1972

Holmberg, Andrea: A systems engineering approach to biotechnical processes: experiences of modelling, estimation and control methods. 1981

Hirvonen, Juhani: Two-level solution strategies for constrained optimal control problems. 1982

Hämäläinen, Raimo P.: Optimal controller design by nonlinear and game theoretic methods. 1976.

Karttunen, Pauli: Dynamic model systems and time optimal position control of the induction machine. 1968

Kivinen, Jaakko: Hierarchical systems approach applied to planning and control in corporations. 1977

Orava, Jussi: State estimation of polynomial type nonlinear differential systems. 1975

Pingoud, Kim: Hydrologic modelling of infiltration and overland flow in rainfall-runoff processes. 1985

Ranta, Jukka: On the mathematical modelling of microbial age dynamic and some control aspects of microbial growth processes. 1982

Rissanen, Jorma: On the theory of self-adjusting systems designed by use of a functional derivative technique. 1965

Salovaara (nyk. Ruuth) , Sampo: On set theoretical foundations of system theory. A study of state concept. 1967

Segerstahl, Boris: On the computation of density functions of parameters in stochastic systems. 1969

Ylinen, Raimo: An algebraic theory for analysis and synthesis of time-varying linear differential systems. 1980

TKK automaatiotekniikka (1985-)

Aalto, Hans: Real-time receding horizon optimisation of gas pipeline networks. 2005

Appelqvist, Pekka: Mechatronics Design of a Robot Society - A Case Study of Minimalist Underwater Robots for Distributed Perception and Task Execution. 2000

Hartikainen, Kari: Motion planning of a walking platform designed to locomote on natural terrain. 1998

Kallela, Jari: Automaation paradigmat: käyttäjien osallistuminen automaation suunnitteluun. 1996

Kauppi, Ilkka : Intermediate language for mobile robots. 2003

Koskinen, Kari: Autonomous or tele-operated mobile machines and robots. 1994

Lehtinen, Hannu: Force based motion control of a walking machine. 1994

Silvennoinen, Eero: Research and Development Cooperation and Technology Transfer as Strategic Instruments: A General Assessment and a Case Study of Simulation Software Development. 1996

Visala, Arto: Modeling of Nonlinear Processes using Wiener-NN Representation and Multiple Models. 1997

Salminen, Riku: Robust pole placement control of a trolley crane system. 1992

Selkänaho, Jorma: Adaptive autonomous navigation of mobile robots in unknown environments. 2002

Sievänen, Risto: Construction and identification of models for tree and stand growth. 1992

Sirola, Miki : Computerized decision support systems in failure and maintenance management of safety critical processes. 1999

Suomela, Jussi : From teleoperation to cognitive human-robot interface. 2004

Vainio, Mika: Intelligence through interactions -Underwater Robot Society for Distributed Operations in Closed Aquatic Environment. 1999

Visuri, Pertti: Intelligent Multivariable Process Supervision. 1986

Xu, Bing: An interactive method for robot control and its application to deburring. 1998

Yang, Haifeng: Vision Methods for Outdoor Mobile Robot Navigation. 1995

Zhang, Xia-Chang: Aspects of Modelling and Control of Bioprocesses. 1995

TKK säätötekniikka (1969-94)

Hyötyniemi, Heikki : Self-Organizing Artificial Neural Networks in Dynamic Systems Modeling and Control. 1994

Jutila, Pentti: Development of adaptive pH-control algorithms based on a physico-chemical approach. 1983

Jämsä-Jounela, Sirkka-Liisa: Modern approaches to control of mineral processing. 1990

Kortela, Urpo: Estimation and compensation of feed disturbances in some problematic processes. 1980

Lautala, Pentti: Some mathematical techniques for the solution of dynamical optimization problems; application to hydro-electric power plant systems. 1978

Nihtilä, Markku: Deterministic filtering algorithms for non-linear differential systems. 1979

Pajunen, Grazyna: Application of a model reference adaptive technique to the identification and control of Wiener type nonlinear processes. 1984

Tian, Lin: The identification and robust control of time variable flow processes: a fir approach. 1994

Wiio, O. Aaro: Proportional-plus-multiple integrative and derivate output feedback for processes with numerator dynamics. 1982

TKK systeemiteknikka (1995-)

Alanen, Raili: Analysis of Electrical Energy Consumption and Neural Network Estimation and Forecasting of Loads in a Paper Mill. 2000

Elmusrati, Mohammed: Radio Resource Scheduling and Smart Antennas in Cellular CDMA Communication Systems. 2004

Gadoura, Idris: Design of Robust Controllers for Telecom Power Supplies. 2002

Hasu, Vesa: Radio Resource Management in Wireless Communication: Beamforming, Transmission Power Control, and Rate Allocation. 2007

Juslin, Kaj: A Companion Model Approach to Modelling and Simulation of Industrial Processes. 2005

Jääntti, Riku: Power Control and Transmission Rate Management in Cellular Radio Systems - A Snapshot Analysis Approach. 2001

Kantola, Kalle: Modelling, Estimation and Control of Electroless Nickel Plating Process of Printed Circuit Board Manufacturing. 2006

Lantto, Erkki: Robust Control of Magnetic Bearings in Subcritical Machines. 1999

Mäenpää, Tapio: Robust Model Predictive Control for Cross-Directional Processes. 2006

Nissinen, Ari: Neural and Evolutionary Computing in Modeling of Complex Systems. 1999

Ojala, Pasi: Design and Control of the Piezo Actuated Micro Manipulator. 1997

Paanasalo, Jari: Modelling and Control of Printing Paper Surface Winding. 2005

Pulkkinen, Jukka: Capacitance and Diameter Control in Telephone Cable Insulation Process. 1997

Pöyhönen, Sanna: Support Vector Machine Based Classification in Condition Monitoring of Induction Motors. 2004

Tammi, Kari: Active Control of Radial Rotor Vibrations: Identification, Feedback, Feedforward, and Repetitive Control Methods. 2007

Tenno, Ander: Modelling and Evaluation of Valve-Regulated Lead-Acid Batteries. 2004

Uykan, Zekerija: Clustering-Based Algorithms for Radial Basis Function and Sigmoid Perceptron Networks. 2001

Viitamäki, Paavo: Hybrid Modeling of Paper Machine Grade Changes. 2004

Virtanen, Timo: Fault Diagnostics and Vibration Control of Paper Winders. 2006

Ylén, Jean-Peter: Measuring, Modelling and Controlling the pH Value and the Dynamic Chemical State. 2001

Zenger, Kai: Modelling, Analysis and Controller Design of Time-Variable Flow Processes. 2003

TKK automaation tietotekniikka (1997-)

Honkanen, Tuomo: Modelling Industrial Maintenance Systems and the Effects of Automatic Condition Monitoring. 2004

Karhela, Tommi: A Software Architecture for Configuration and Usage of Process Simulation Models: Software Component Technology and XML-based Approach. 2002

Kuikka, Seppo: A batch process management framework: Domain-specific, design pattern and software component based approach. 1999

Mäkelä, Hannu: Outdoor Navigation of Mobile Robots. 2001

Seilonen, Ilkka: An Extended Process Automation System: An Approach based on a Multi-Agent System. 2006

TKK prosessien ohjaus ja säätö (1988-)

Järvensivu Mika: Intelligent Control of the Lime Kiln Process With Respect to Environmental Requirements. 2004

Komulainen Tiina: Novel modeling and control approach for performance improvement of an industrial copper solvent extraction process. 2007

Laukkanen Ismo: Knowledge transfer and competence development in complex paper production environments. 2008

Ollila Antero: Quality Improvements through ISO 9000 Standards. 1996

Välisuo Heikki: Model-based Reasoning and Control of Process Plants. 1994
