

To See and Detect

Test Systems. When electrical testing just tells half of the product quality, we'll help you see the whole thing. With a **complete test system** – including **electrical testing and machine vision** inspection.

Machine Vision Components. Because we're familiar with very special requirements, we can supply you with the most suitable machine vision components for **your** special needs.

If you've decided to have a total quality control, please check us at www.orbis.fi
