Manufacturing

Oil & Gas

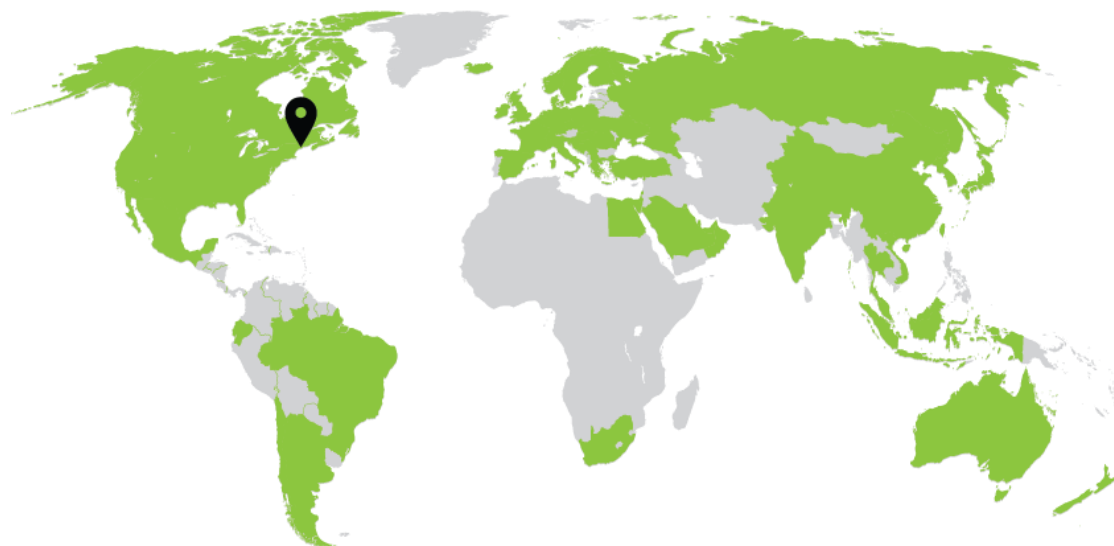

Building Automation

Power

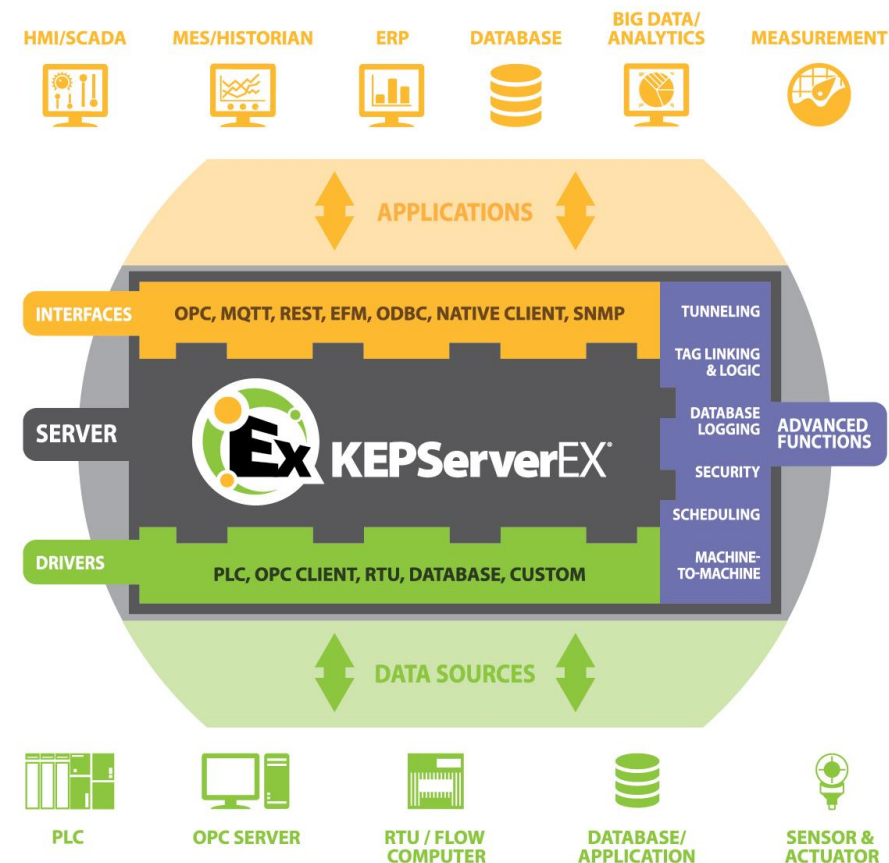

IT & Infrastructure

KEPServerEX Connectivity Platform

- Offers a library of 150+ device drivers, client drivers, and advanced plug-ins—supporting thousands of devices and other data sources
- Provides industrial operations data to traditional Industrial Automation clients (via OPC and proprietary protocols) and new IoT solutions (via MQTT and IT-centric protocols)
- Meets the highest standards of quality through third-party validation

Kepware and OPC

OPC Foundation member since 1998

OPC Specifications:

- OPC Data Access (DA)
- OPC Alarms and Events (AE)
- OPC Historical Data Access (HDA)
- OPC XML Data Access (XML-DA)
- OPC .NET
- OPC Unified Architecture (UA)

Industrie 4.0 and the Smart Factory

Key advantages of smart factory production:

- Self-aware factory units
- Manufacturing optimized for an individual customer
- Resource efficient production
- Machine adaptability to human work cycle

KEPServerEX Roadmap

- **OPC UA:** Native development of core OPC UA technology
 - Improved performance, stability, and diagnostics
 - Creates a foundation for support of higher level OPC UA features, including:
 - Nano Profile
 - Discovery
 - Complex Data
 - Methods
 - Historical Data
 - Alarms & Conditions
- **Localization:** German and Japanese translation for core functions and key drivers
- **Configuration API:** REST-based API for the configuration of channels, devices, and tags
- **Licensing:** Improved experience for online servers, annual support, and demo trials
- **User Interface:** Unified project browser, standardized property model grid, improved wizard, and more
