FINNISH SOCIETY OF AUTOMATION
SUOMEN AUTOMAATIOSEURA RY

A background image showing two men in white shirts looking at a screen in a factory setting. The image is slightly blurred and has a dark overlay to make the text stand out.

“

Today, companies need to be able to respond to volatile demand, uncertain supply and constrained capacity. But as we look beyond the pandemic, they must also be able to respond to demanding customers who will look for individualized and sustainable products. If anything, this volatility has highlighted the need for digital transformation and industry 4.0.”

Forbes, 2020

What are the drivers?

smaller volumes

- raising variability of products with smaller volumes to meet individualization and customization

higher innovation flexibility

- reduced time to market to react to volatility and ambiguity of the market

higher location flexibility

- more sustainable and resilient supply chains in a mega city structured world

sustainable production

- responsible resource aware production

**Manufacturing of the future:
Think smaller, more flexible, more
sustainable, yet cost competitive**

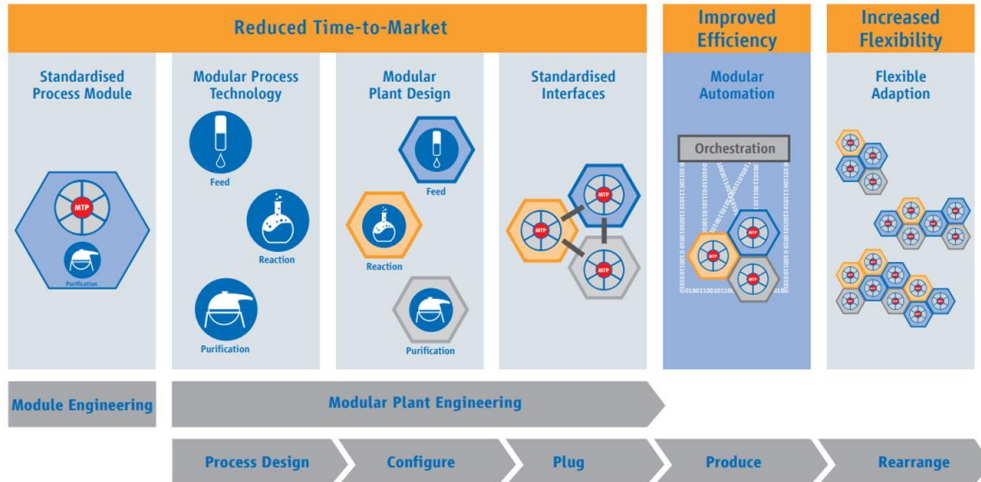

MT... What?

- Module Type Package
 - This standard specifies the general automation concepts of modular equipment for the process industry and provides the basic definitions for the specification of interfaces and information models.
 - It is a harmonized format to describe modular production equipment (MTP-File)
- Contains all information to integrate a fully automated module in the Process Control Level
 - Communication technology
 - Operator interface (HMI)
 - Functionalities (Services) and their interfaces
 - Interfaces to diagnosis and maintenance information

MTP Value Journey

Standardization VDI/VDE/NAMUR 2658 (GMA 5.16) Status 2021-11

WG: working group, CP: concept paper, CD: committee draft, PD: Public draft, IR: internal release, PR: public release)

<https://www.vdi.de/2658>

2658-X	Title	WG	CP	CD	PD	IR	PR	Comment
1	Basic Concept				✓		✓	Released 10-2019
1:2022	Basic Concepts Revision							CD released to VDI, PD to be published 02-2022
2	HMI Concept				✓		✓	Released 11-2019, Erratum to be published 02-2022
3	HMI Interfaces				✓		✓	Released 09-2020, Erratum to be published 02-2022
4	Process Control w Services				✓			PD released 08-2020, IR released to VDI, PR 02-2022
4.2	OPC UA Method Interface							Task Force established
4.3	Service Relations							Task Force established
4.4	Cross Communications							<i>New Work Item Proposal</i>
5	Runtime Concept							CD released to VDI
5.1	Runtime OPC UA							CD WIP final editing round
6	Alarm Mgmt Concept				✓			IR WIP, IR planned for 12-2021
7	Alarm Mgmt Models				✓			PD released 02-2021, IR planned for 12-2022
7.1	Alarm Mgmt OPC UA							CD WIP, CD planned for 12-2021
8	Safety Concept							CP WIP in NAMUR AK 4.5.1, CD release 02-2022
9	Safety Interfaces							Follow up to Sheet 8 in NAMUR AK 4.5.1
10	Diag & Maint – PEA							CP WIP in NAMUR AK 4.1.1
11	Diag & Maint – Plant							CP WIP in NAMUR AK 4.1.1
12	PEA Qualification							CP WIP in NAMUR AK 2.4.1
14	MTP Certification Process							<i>New Work Item Proposal</i>

MTP is built on and relates to many standards

Functional Interface

- Described in the MTP-Part
- Services, Procedures, Parameters
- Configuration and Variables
- HMI Description

```

ModuleTypePackage
├── IE PeaExample {Class: ModuleTypePackage Role: AutomationMLBaseRole}
│   ├── IE Communication {Class: CommunicationSet Role: AutomationMLBaseRole}
│   ├── IE Services {Class: ServiceSet Role: AutomationMLBaseRole}
│   └── IE ProcessValues {Class: ProcessValueSet Role: AutomationMLBaseRole}
    
```

Communication Interface

- Described in the Communicaton Class
- OPC-UA Server
- All dynamic MTP data is mapped to OPC

```

ModuleTypePackage
├── IE ModuleName {Class: ModuleTypePackageEx Role: AutomationML}
│   └── IE CommunicationSet {Class: CommunicationSet Role: AutomationML}
│       └── IE SourceList {Class: SourceList Role: AutomationMLBaseRole}
│           ├── IE OPCUAServer {Class: OPCUAServer Role: AutomationML}
│           │   ├── AB001_CloseFbk {Class: OPCUAItem}
│           │   └── AB001_CloseAut {Class: OPCUAItem}
│           ├── IE BasicServerProfile {Class: BasicServerProfile Role: AutomationML}
│           ├── IE StandardServerProfile {Class: StandardServerProfile Role: AutomationML}
│           └── IE ExtendedServerProfile {Class: ExtendedServerProfile Role: AutomationML}
    
```

What's Next

- MTP is still an evolving standard
- Today MTP does not leverage all features of OPC-UA
- MTP is not aligned with all potential companion specs
- MTP to become IEC63280
- MTP Services (VDI 2658-4) will be extended by the introduction of OPC-UA Method Calls (Part 4.2)
- MTP Services (VDI 2658-4) will be extended by the introduction of Module-to-Module cross communication (Part 4.4)
- MTP Runtime Concepts (VDI 2658-5) to describe the basic, abstract interface to the POL
- MTP Runtime OPC-UA (VDI 2658-5.1) describes the specific OPC-UA implementation
- MTP Alarms (6,7,7.1) take care of Alarms and exceptions based on OPC-UA A&C
- MTP Safety (VDI 2658-8) will introduce functional safety based on OPC-UA Safety

EcoStruxure Automation Expert

Game changing platform independent automation solution

Based on IEC 61499

Proof of Concept

Joint PoC with GEA to demonstrate MTP using IEC 61499

GEA provided the equipment and process description for the PEA

Schneider Electric delivered the full automation Solution

Key takeaways:

MTP for the PEA developed in IEC61499

Reusable, Asset centric, Flexible

EcoStruxure Automation Expert also used for the orchestration with AVEVA System Platform

Visit us at SPS in Nuermberg

The demonstrator will be shown at SPS in Nuermberg

A banner for the SPS 2021 exhibition. The top left corner features the 'sps' logo in white on a dark blue background, with 'smart production solutions' written below it. The main text 'Become an exhibitor at the SPS 2021' is in white. Below this is a 'REQUEST INFORMATION' button. The background image shows a busy exhibition hall with people and industrial equipment. In the bottom left, a dark blue box contains the dates '23. – 25.11.2021' and the location 'Nuremberg', with a 'TICKETS & REGISTRATION' button below it.
